DETAILED ACTION

Election/Restrictions

- I. Claims 1 and 2 drawn to an electric machine with a detections stator, classified in class 310, subclass 68b.
- II. Claims 4-11, drawn to Method for position a rotational position sensor, classified in class 29.
- III. Claim12 13, drawn to a device for a position sensor for rotating machine, classified in class 318, subclass.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

2. Inventions I and III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed.

Art Unit: 2834

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Applicant's representative on August ,31,2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
